

VAPERTIP

Filling Instruction

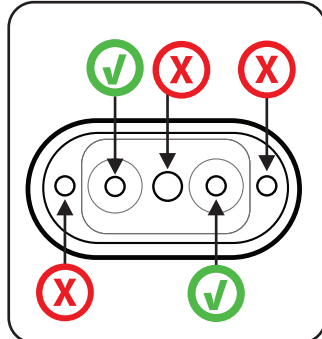

For best results, fill with a 16 gauge SS blunt tip needle that is 1" long.

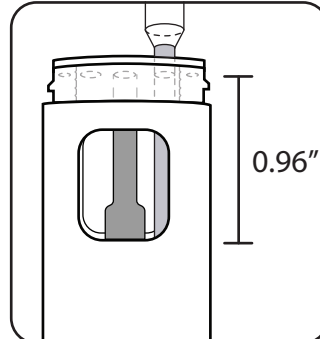

Follow these directions for ideal filling process

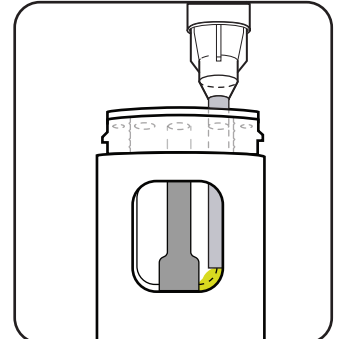

Inspect the set;
Replace gasket
pieces before fill

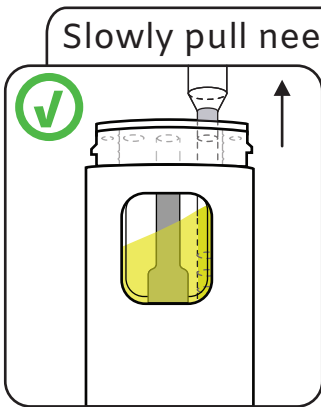

Locate Fill Area
(Topview
Gasket in Device)

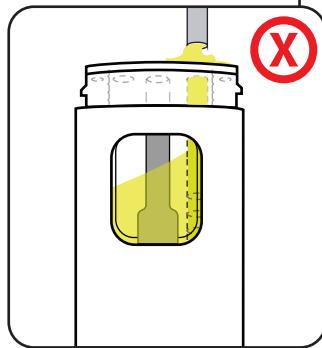

Insert Needle;
All the way

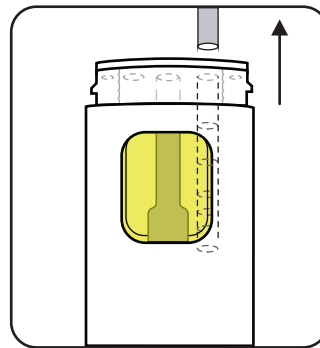

Begin filling by
pulling the needle
off the bottom of
the tank

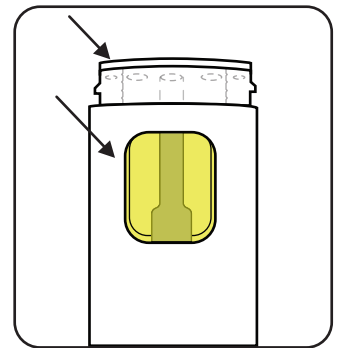

Filling should
look like this

Avoid pulling the
needle too far out
while filling

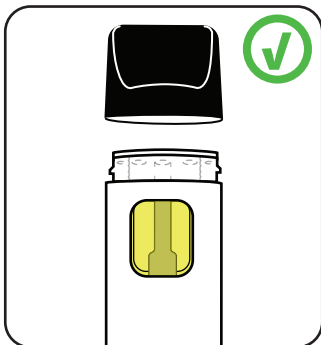

After filling -
Remove Needle

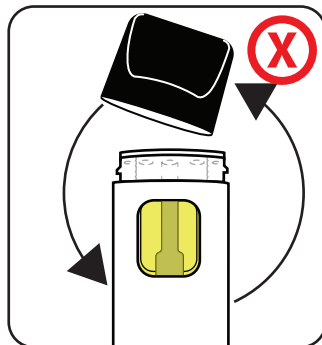

Inspect the fill

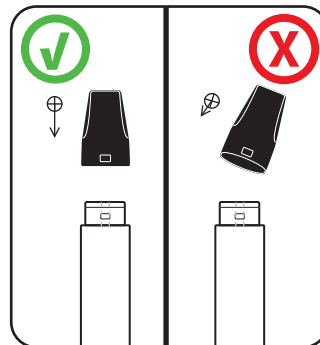

Check the top
gasket has tight fit

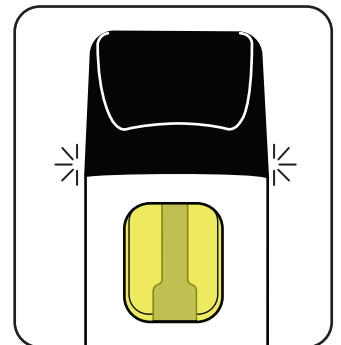

Front View
(Mouthpiece
aligned)

Avoid This -
Align Mouthpiece

Side View
Align Mouthpiece
